

## THE EXISTENCE OF THE UNIVERSE

The emergence of the universe in the Qur'an is explained as follows:

"It is the creator of the heavens and the earth from nothing ..."

(Surat al-An'am, 101)

This information given in the Qur'an is in complete harmony with the findings of contemporary science.

It is within. The final conclusion reached by astrophysics today is the matter and with time dimensions, in a zero moment, with a big bang it is that. "Big Bang", originally called "Big Bang" theory, with the explosion of a single point about 15 billion years ago proved to occur from absence. The Big Bang theory is the existence of the universe today and The only scientific topic that is accepted by all scientific circles for its beginning explanation is.

There is no such thing as matter before the Big Bang. Matter, energy, even time in an absence environment where it is absent, which can be completely described as metaphysical, time was created. This great truth revealed by modern physics is 1400 years in the Qur'an. prior notice is provided.

Dark brown regions background show radiation. Open brown areas are cold. Light pink regions are hot. Dark pink areas are the most indicates hot places.

Sensitive scanners of the Cobe satellite sent by NASA in 1992

The radiation that is supposed to spread to the entire universe after the Big Bang

He found his remains. The present invention is the fact that the universe was created from nothing It proved the Big Bang theory with a scientific explanation.

## EXPANSION OF THE UNIVERSE

At a time when astronomy science was not yet developed, 14 centuries

As the universe has expanded in the Holy Qur'an,

It is mentioned:

"We have built the sky 'with great power' and certainly we (him) expanding it. "

(Surat Zariyat, 47)

The word "sky" in the verse is the space and universe in many parts of the Qur'an.

It is used to mean. It is also used here in this sense. So

In the Qur'an, the universe has been reported to be expansive. Science existed today the result is the same as reported in the Qur'an.

Edwin Hubble with his giant telescope

Until the beginning of our century, the only view that prevailed in the world of science is that "the universe is stationary.

it has a structure and has been going on forever. "However, research, observations and calculations made by today's technology revealed that the universe had a beginning and was constantly "expanding".

Russian physicist Alexander Friedmann and the Belgian universe

the scientist Georges Lemaitre earlier this century

the universe is in constant motion, and

they theoretically calculated that it was expanding.

This fact is also observational in 1929.

Proved. American astronomer Edwin Hubble

examining the sky with the giant telescope he uses

the stars and galaxies are constantly

He discovered that they were diverging from each other. everything

if it is a universe where it is constantly moving away from each other,

means an ever-expanding universe

It was coming. The universe is expanding, advancing

**It became definite with the observations over the years.  
But this fact, by no one yet  
while unknown, it was revealed centuries ago in the Qur'an.  
Because the Qur'an is the creator and judge of the whole universe.  
It is the word of Allah.**

The universe has always been a big moment since the first explosion.  
It is expanding rapidly. scientists  
on the surface of a bubble that expands the expanding universe  
It is simulation.

**Separation of the earth from the skies**

**Another verse that talks about the creation of the heavens is as follows:  
"Do those who disbelieve not see that they (at first) eat with heavens,  
while adjacent to each other, We separated them and  
We created from water. Will they still not believe? "  
(Surat an-Enbiya, 30)**

---

## **Page 3**

Representative Big Bang picture above  
Seen. God's universe from nothing  
revealing once again that it exists  
Big Bang, proven by scientific evidence  
is a theory. Some scientists Big  
To produce alternatives to Bang  
studied, but the evidence obtained  
A definite in the science world of Big Bang  
resulted in acceptance.

**"Ratk" translated as "adjacent" of the verse  
word in Arabic dictionaries "intertwined, inseparable"  
In this case, it means "fused."**

**This word is used to describe the two substances that make up.  
The phrase "separated" in the verse is the Arabic verb "fatk" which means  
The verb is splitting and breaking out an object in the form of a "ratk"  
means to come out. For example, by sprouting the seed  
Its emergence from the soil is expressed in Arabic by this verb.  
Now let's look at the verse again. In the verse, the earth and the earth  
adjacent, that is, in a state of "ratk"**

**Mentioned. Then these two leave with the verb "fatk".**

**So one goes out creating another. Indeed Big  
When we remember the first moment of Bang,  
we see that it contains all its substance. So everything, even  
Even the "heavens and the earth", which has not been created yet,  
They are in the "ratk" state. Then this point violently  
explodes and in this way the substances become "fatk" ...**

**Scientific findings in the verse  
that they are in complete harmony**

**We see. These findings, which were reported 14 centuries ago,  
Scientific reveal only in the 20th century  
it was possible.**

### **ORBITS**

**When talking about the Sun and the Moon in the Qur'an, each one has a certain trajectory.  
It highlighted:**

**"It is He who creates the night, the day, the Sun and the Moon;  
each swimming in an orbit. "  
(Surat an-Enbiya, 33)**

**In another verse, where the sun is not fixed, it is traveling in a certain orbit,  
It is reported as follows:**

**"The sun is also flowing towards a (determined) decision place for itself.  
This superior and powerful is the discretion of the knower. "  
(Surah Yasin, 38)**

**These facts reported in the Qur'an can only be achieved through astronomical observations in our  
age.**

It understood. Solar, Solar Apex name according to the calculations of astronomy experts  
720 thousand km per hour in the direction of Vega Star along a given trajectory  
It moves at tremendous speed. This is a rough calculation, the Sun's 17 per day  
280 thousand km. indicates that it has come. His attraction system with the Sun  
All the planets and moons in it cover the same distance. Also, in the universe  
all the stars have a planned movement like this.

In the Qur'an, the whole universe is equipped with such orbits,

It is:

"May the sky be" equipped with roads and orbits in care ".

(Surah Zariyat, 7)

There are about 200 billion galaxies in the universe and an average of 200 billion in each galaxy  
stars are found. The planets of many of these stars, and the satellites of these planets

---

## Page 4

has. All these celestial bodies have orbits determined with very fine calculations. And  
for millions of years, each has a perfect harmony with its own orbit and  
flows in order. Apart from these, many comets are also  
swims in orbit determined for.

Orbits in the universe do not only belong to celestial bodies. Galaxies are also amazing  
they move on planned and affordable orbits at speeds. These movements

During the war, no celestial body collides with one another, its paths do not cross.

Of course, in the time when the Qur'an was downloaded, humanity, like today, millions of space  
advanced telescopes to telescopes

technology, modern physics and astronomy. because of

space, as reported in the verse, "equipped with paths and orbits with care"

it was impossible to determine scientifically. But in that age

This truth is clearly notified to us in the downloaded Qur'an; because

The Qur'an is the word of God.

### WORLD ROUND

“He created the heavens and the earth as a right. Day and night wraps and covers, day and night wraps and covers ... „

(Surah Zumer, 5)

The expressions used in the verses of the Qur'an introducing the universe are quite it is remarkable. Translate as "wrapping" in the above verse Arabic word is "tekvir". Turkish equivalent of this word, It is "wrapping an object on something round". (For example Arabic Verbs containing "round wraps" in dictionaries This word is used).

In the verse, the night and day are covering each other.

The information given about (repudiation) is also contains precise information about its format. However and only Verb expressed in this verse if the Earth is round

---

## Page 5

It may occur. So in the Qur'an, which was downloaded in the 7th century, has been pointed out.

It should not be forgotten that the understanding of astronomy at that time was He senses. At that time, the Earth was thought to be a flat surface, and all scientific calculations and explanations were made accordingly. The verses of the Quran are to us it gives the information we have learned in this century yet. The Quran is the word of God For describing the universe, the most accurate words possible were used.

### PROTECTED CEILING

In the Qur'an, God draws attention to an interesting feature of the sky as follows:

“We made the sky a protected ceiling;  
they are turning away from the verses of this. ”

(Surat an-Enbiya, 32)

This feature of the sky mentioned in the verse is based on scientific research in the 20th century. It has been proven.

The atmosphere that surrounds our globe is vital for the continuation of life. performs functions. Many big and small sky stones approaching the world dissolves and destroys them and falls on earth to cause great harm to living things. obstacles.

The atmosphere also filters rays from space that are harmful to living things. would. The interesting thing is that only the harmless ratio of the atmosphere is visible, that is, light is that it transmits infrared rays and radio waves. All this for life are the necessary rays. For example, it is allowed to pass through the atmosphere at a certain rate ultraviolet rays, plants do photosynthesis and therefore all living things

It is of great importance for their survival. Severe radiated by the sun most of the ultraviolet rays are filtered through the ozone layer of the atmosphere and

A small amount of life is needed that reaches the earth's surface.

The protective feature of the atmosphere does not remain with them either. Earth, average minus 270 of space

it is protected from the freezing temperature of the cold again thanks to the atmosphere.

The atmosphere allows only the rays necessary for living things to pass to the earth. For example, ultraviolet rays from these rays reach us at certain rates. This rate is the most important for plants to do photosynthesis and thus to keep all living things alive. has the appropriate size.

The sky that is about to hit Earth in this representative picture  
stones are seen. Celestial stones circulating in space

It could pose a very important danger to our world. But

God is a ceiling that protects the atmosphere with its flawless creation.

It has made. Thanks to this special protection, the sky stones

For most people watching the sky, the atmosphere

it does not have a protective structure. What kind of place does Earth have without this structure?  
people do not think that it will happen. Above

---

## Page 6

damage to Earth as the majority of it breaks down in the atmosphere

It does not.

pictured is a meteorite falling on Earth opened in Arizona, USA

a giant pit is observed. If there was no atmosphere, this sky

Millions of stones fall to the surface of the earth and the planet

it would become uninhabitable. However, the protective feature of the atmosphere

Thanks to all living things on Earth

They maintained. This, of course, is a

and it is a miracle reported in the Qur'an.

It is not just the atmosphere that protects the Earth from harmful effects. Besides the atmosphere

A so-called "Van Allen Belts" originating from Earth's magnetic field

the layer acts as a shield against harmful rays coming to our planet.

These rays, which are constantly emitted from the sun and other stars, are

has a lethal effect. The name "flare" that occurs frequently in the sun, especially

the energy bursts given, without Van Allen Belts, destroy all life on Earth

is able to handle.

The importance of the Van Allen Belts for our life. Hugh Ross as follows

describes:

The Earth has the highest density among the planets in the Solar System. This

the large nickel-iron core is responsible for a large magnetic field. This magnetic

area creates the Allen Allen radiation shielding layer. This layer

protects the earth from radiation bombardment. If this protective layer

Life on Earth would not have been possible without it. Magnetic field and rocky

The only other planet consisting of regions is Mercury. But the strength of this magnetic field

It is 100 times less than Earth's. Van-Allen radiation shielding layer

It is special to the world. one

The energy released in a glare detected in the past years, to Hiroshima

it is calculated that the equivalent of 100 billion atomic bombs thrown.

58 hours after the glow, excessive movements were observed in the hands of the compass, Earth

250 km above its atmosphere, the temperature jumped to 2500 ° C.

In short, on the Earth, against the dangers that surround itself and surround it.

works an excellent system that protects. Here is this protective shield of the Earth sky

its feature has been revealed to us in the Qur'an hundreds of years ago by Allah.

Released in the sun glare

energy in understanding the human mind

severe enough to have difficulty: single

a flare, thrown into Hiroshima

100 billion atomic bombs

is equivalent. The world is destructive

atmosphere and energy from Van Allen

It is protected by its belts.

Extremely favorable for live life

out of the atmosphere from Earth,

so when you go out into space it's freezer

a cold is encountered. World,

average -270 degrees of space

from the freezing cold again

thanks to its atmosphere.

Earth's magnetic field

magnetosphere layer, the earth is made of sky stones,

protecting it from harmful cosmic rays and particles

like a shield. Van Allen in the picture above

This magnetosphere layer, also called the belts

Seen. Tens of thousands of kilometers of the world

These generations far away are

from lethal energy from space

Remains.

---

## Page 7

All these scientific findings prove that the Earth is specially protected. The important thing is that this protection

This is the fact that it was notified in the Qur'an 1400 years ago with the verse "We have made the sky a protected ceiling".

### RECYCLING SKY

In the Qur'an, in the 11th verse of Surat al-Tarik, the "reversible" of the sky

feature is mentioned:

"May the sky be returning."

(Surah Tarik, 11)

The word translated as "backward" in the Qur'an is "translator" or means "returning."

As it is known, the atmosphere surrounding the Earth consists of many layers. Each layer has an important task for the benefit of life. Every time it is examined matter or rays reaching the layer itself back into space or back to earth

It has been understood that it has rotating features. Here the atmosphere layers

Let's examine the rotating feature with a few examples.

For example, the Troposphere layer between 13 and 15 km high, the water rising from the earth It provides the steam to condense and return to the ground as precipitation.

Radiation and harmful ultraviolet from the Ozonosphere space at a height of 25 km

It reflects its rays and allows them to return to space before they reach the earth.

The ionosphere layer is like a satellite that transmits radio waves from the earth.

by reflecting back to different parts of the earth, radio conversations, radio and

It enables television broadcasts to be watched from long distances.

The magnetosphere layer, on the other hand, is a harmful radioactive emitted from the Sun and other stars.

it returns particles into space before they reach the earth.

This feature of the sky layers that was discovered recently

it is stated in the Qur'an before that it is the word of God once again

It emphasizes.

For the living life on Earth,

its existence is extremely important. Of water

One of the factors in its formation

one of the layers of the atmosphere

It is the troposphere. Troposphere layer

water vapor rising from the oceans

by intensifying rain on the earth

returns as.

Deadly for life on earth

blocking any rays

the atmosphere layer, the Ozonosphere

It is layer. Ozonosphere layer

harmful cosmic rays, such as ultraviolet

returning to space, these rays

reach earth and vitality

prevents it from damaging.

Every layer of the atmosphere

has useful properties. for example

one of the top layers of the atmosphere

Ionosphere layer, which is a certain

radio broadcast from the center

by reflecting the waves back to the earth

these broadcasts even from long distances

provides perception.

## LAYERS OF THE ATMOSPHERE

One of the information about the universe in the verses of the Qur'an is that the sky is seven times is arranged as:

"It is He who creates all that is on the ground for you.

Then he invaded them into the sky, and they

He is the organizer. And He knows everything. "

(Surat al-Baqara, 29)

"Then he turned to the sky, which was in smoke;

So he completed them as seven skies in two days

and he revealed his command to each sky ... "

(Surat Fussilet, 11-12)

---

## Page 8

The world has all the necessary features for life.

It has. One of them is the special that protects living things.

it is the atmosphere that performs a shield task. Today

The atmosphere of the world is lined up in a row

It is known to consist of layers. Atmosphere

exactly as stated in the verse, seven basic

It consists of layers. This is, of course, the Qur'an.

is one of his miracles.

Many in the Qur'an  
used in verse  
sky word all  
expressing the universe  
used for  
like the sky of earth  
also to express  
used.

This is the word  
Given its meaning,  
The sky of the world,  
in other words  
the atmosphere, 7  
from layer  
the result of occurrence  
out

It stands out.  
Indeed today  
world  
top of the atmosphere  
different lined up  
the layer  
where it occurs  
It is known.

Moreover, exactly  
in verse  
like, exactly seven  
basic

The layer ...

In a scientific resource, this issue is explained as follows:

Scientists have discovered that the atmosphere consists of many layers. Layers,  
with obvious physical properties, such as pressures and the composition of the gases that create them  
they differ from each other ... The closest layer of the atmosphere to Earth  
"TROPOSPHERE" is. It makes up 90% of the total mass of the atmosphere ...

The layer on it is "STRATOSFER" ... In the Stratosphere, ultraviolet rays are absorbed.  
layer is called "OZONOSFER" ... The layer above the stratosphere

It is called "MEZOSFER" ... There is a "THERMOSFER" on the Mesosphere ... Ionized  
gases Another layer called "IONOSFER" inside the Thermosphere

They form ... The outermost layer of the world atmosphere is 450 km. from 960 km. up to

---

## Page 9

It extends. This layer is called "EXHAUST". <sup>2nd</sup>

14 centuries ago, the sky

a whole

when it is thought

In the Qur'an, the sky

composed of layers

come from, moreover this

the number of layers

a miraculous "seven"

format news

It was given.

Contemporary science is

Surrounding our world

the atmosphere is the main

"seven" from the main layer

but that

recently revealed

Laid-back.

Specified in this source

when we count their layers

as reported in the verse of the atmosphere

- exactly 7 layers  
 we see it occurs:  
 1- TROPOSPHER  
 2- STRATOSPHER  
 3- OZONOSPHER  
 4- MESOSPHER  
 5- THERMOSPHER  
 6- IONOSPHER  
 7- EXHAUST

Another important miracle on this subject is the 12th verse of Surat al-Fussilet. It is stated in the statement "He had commanded each of the sky". In other words, Allah It is stated that he assigned the layer with a certain task. Indeed, earlier as we see in the chapters, each of the layers we counted above very vital duties for the benefit of people and all living things on earth has. From the formation of rains, to prevent harmful rays, radio from the reflection of the waves to the harmlessness of the sky stones. the layer has a unique function. For example, one of these tasks was reported in a scientific source as follows: The Earth's atmosphere consists of 7 layers. The bottom layer is the Troposphere. Rain, snow and wind occur only in the Troposphere. .

---

## Page 10

This is impossible to detect without 20th century technology. the information is clearly reported in the Quran, which was downloaded 1400 centuries ago, it is a great miracle.

### MOUNTAIN MISSION

In the Qur'an, attention is drawn to an important geological function of the mountains:

“We created constant mountains on earth, so that it does not shake them...”

(Surat an-Enbiya, 31)

If you pay attention, in the verse, a feature of mountains preventing shaking on the earth

It is reported that.

Schematic section.

The mountains have roots quite deep above the soil level.

(EARTH, Press and Siever, p.413)

Pile shekilnedik mountains have roots that are well placed in the soil.

(Anatomy of the Earth, Cailleux, p. 220)

Another picture showing that the mountains resemble piles because of their deep roots. (EARTH SCIENCE, Tarbuck and Lutgens, p.158)

This fact, which is unknown to any person during the time of the Qur'an, today it has been revealed as a result of the findings of modern geology. This According to the findings, the mountains are very large layers that make up the earth's crust. occurs as a result of their movements and collisions.

When two layers collide, the more durable one goes under the other. Top the layer rises by curling and forms the mountains. The bottom layer is Progressing underground, it forms a deep extension downward. So the mountains as deep as the masses we see on earth, moving underground

There are more extensions. In a scientific source, this structure of the mountains is described as follows:

"In the mountainous regions where the continents are thicker, the crust of the earth is deeply in mantle. get stuck. "

In one verse, this function of the mountains is indicated by making the "pile" analogy:

“We have not made the earth a mattress.

Do you?

Mountains are also piles? "

(Surat Nebe, 6-7)

Mountains as above ground  
 in the depths of the underground  
 the earth's crust with its extensions

almost different layers  
rivets to each other like piles.  
Earth's crust is constantly moving  
from layers  
It is formed. This is the mountains  
the riveting feature is extremely  
with a mobile structure  
fixing the earth's crust  
great tremors  
obstacles.

Thanks to these features, mountains are located at the junction of the layers of the earth.  
reaches over and underground, rivets these layers together. In this way,  
fixing the earth's crust on the magma layer or on its own layers

---

## Page 11

prevents it from slipping in between. In short, the mountains, the nails that hold the wood together  
We can compare.

This fixing feature of the mountains is defined in the scientific literature with the term "isostasis".  
The word meaning of Izostasi is as follows:

"Izostasi: ... in geology, the gravitational mountains formed under the surface of the Earth  
ensuring the overall balance of the earth's crust by force. " 5

As can be seen, discovered as a result of modern geological and seismic surveys

A very vital function of the mountains is that in the Qur'an, which was downloaded centuries ago,

It is given as an example of the superior wisdom in his creation. In another verse like this

It is told:

"... In the supply, he left unshakable mountains to shake you ..."

(Surah Lokman, 10)

### MOVING MOUNTAINS

In one verse, the mountains are constantly in motion, as they appear,

They are reported as follows:

"Although you see the mountains, you think it is frozen;

whereas they drift like drifting clouds ... ,

(Surat an-Neml, 88)

This movement of the mountains, from the movement of the earth's crust they are on  
Caused. On the mantle layer, where the earth crust is more dense than itself

it acts as if it is floating. First, Alfred at the beginning of this century

A German scientist named Wegener is the world's first

they were together in their periods, then they were dragged in different directions

He argued that they were separated from each other and moved away.

However, geologists say that Wegener was right 50 years after his death.

They were able to understand in the 1980s. In an article published by Wegener in 1915

As it has been stated, land pieces on earth were formed approximately 500 million years ago.

they were connected to each other, and this big piece of land called Pangaea South

It was located in the pole.

About 180 million years ago, Pangaea split into two. These two drifting in different directions

The first from the giant continent covers Africa, Australia, Antarctica and India

It was Gondwana. The second is composed of Europe without Europe, North America and India.

It was Laurasia. Various in about 150 million years following this division

At times Gondwana and Laurasia were cut into smaller pieces.

These continents, which emerged with the disintegration of Pangaea, are constantly

changing the distribution between the sea, at a speed of several centimeters a year

They are dragged on the surface.

---

## Page 12

It was discovered as a result of geological researches in the early 20th century.

This movement of the earth's crust is explained in scientific sources as follows:

100 km of earth crust and upper mantle. Earth surface "layer" in thickness

It consists of parts called. Six large layers forming the earth's surface, and

there are countless small layers. According to the theory called "layer tectonics", this

the layers carry the continents and the ocean floor along with the Earth they move ... The continental movement is 1 to 5 cm per year. is around It was calculated. As layers move in this way, changes occur. For example, the Atlantic Ocean is a little more every year. It is expanding. .

Another important point to be noted here is that: God moves the mountains reported as "drift" in the verse. Indeed, scientists today this

The English term they use for the movement is "Continental Drift", which means "Continental Drift. " ,

There is no doubt that this scientific fact, which science has discovered, has been revealed in the Qur'an.

It is one of the miracles of the Qur'an.

#### THE SECRET IN IRON

Iron is one of the elements that attract attention in the Qur'an. "Hadid" of the Qur'an

It is stated as follows in the term "Iron":

"... And toughness in himself and for people

We also lowered the iron with (various) benefits ... "

(Surat al-Hadid, 25)

In the verse, the word "lowering" specially used for iron is figuratively it can be thought of as being given to the service of people. But your word says, "From the sky taking into account the true meaning of "physically lowering" it appears to contain an important scientific miracle.

Because modern astronomical discoveries suggest that the iron mine revealed that it came from giant stars.

Heavy metals in the universe, in the nuclei of big stars

Produced. Our Solar System, on the other hand,

it does not have a structure that it can produce. Iron

but a few hundred million in stars much larger than the Sun.

can occur at temperatures up to degrees. Nova or

The amount of iron in these stars called supernova

Once a certain ratio has passed, the star can no longer carry it and explodes. As a result of this explosion,

Celestial stones with iron are scattered into space and gravitated to a celestial body.

it travels in the space until it is caught and hit.

As can be seen from all this, the iron mine has not been formed on Earth, the sky stones

from the supernovae, as stated in the verse "To the world

Scientifically determined in the 7th century when the Qur'an was downloaded.

it is clear that it can not be. However, this fact encompasses everything with its infinite knowledge.

It is located in the Qur'an, the word of God.

In addition, the 25th verse of Surat al-Hadid, which is mentioned in iron, is quite interesting.

contains two mathematical codes:

---

### Page 13

"Al-Hadid"

57 of the Qur'an

time is. "Hand

hadid "

the word

in Arabic

numerical value,

so eternal

when calculated

confronting

the number is the same:

"57"

Just "hadid"

numeric word

**its value is 26. 26  
the number of iron  
is the atomic number.**

Surat al-Hadid  
It is the 57th Sura of the Qur'an,  
The word al-Hadid  
Numerical in Arabic  
the value is 57.  
Just "hadid"  
numeric word  
its value is 26.  
Periodic above  
also from the ruler  
as seen 26  
atomic number of iron  
Is a number. Superior  
mighty  
Allah Hadid  
Downloaded in Surah  
iron in verse  
how it formed  
both draw attention  
the verse contains  
mathematical passwords  
with a scientific  
the miracle to us  
shows.

#### **PAIRS IN CREATION**

“Because they're finishing up, their own yummy  
and all the pairs of things they didn't know  
the Creator (Allah) is great. ”

(Surah Yasin, 36)

While masculinity is a counterpart to the concept of "couple", it is mentioned in the verse.  
The expression "from many things they do not know" contains a broader meaning. Thus  
today we encounter one of the meanings of the verse. Article  
British scientist Paul Dirac, who revealed that he was created in pairs, in 1933  
He won the Nobel Prize in Physics. The present invention, called "Parité,"  
It revealed a pair called matter. Anti-matter, opposite of matter  
It has features. For example, unlike matter, electrons of anti-matter plus,  
protons are also minus charged. This fact is stated in a scientific source  
It is:

"... Every particle has an antiparticle at opposite charge. The relation of indecision tells us that these  
pairs  
that its existence and extinction are occurring everywhere and all at the same time.  
show. "8

#### **TIME RELEVANCE**

The relativity of time is a scientific fact proven today. But this  
the truth emerged at the beginning of the century with Einstein's theory of relativity. HE  
Until the time, people thought that time is a relative concept,  
they did not know that it could vary. But the great scientist Albert Einstein,  
With the theory of relativity, he clearly proved this fact. Your time, mass and speed  
it was a dependent concept. No one throughout human history  
he had not made it clear.

With one exception; In the Qur'an, information was given that shows that time is relative! This  
We can list some verses on the subject as follows:

---

#### **Page 14**

“They want you to bring the punishment back and forth; God,  
it does not strictly oppose its promise. Truly, one day in the sight of your Lord,  
It is like a thousand years of what you are counting. ”

(Surat al-Hajj, 47)

“He evolves and organizes everything from sky to earth. Then (works) your  
He rises to Him on a thousand-year day you are counting. ”

(Surah Prostrate, 5)

“Angels and Spirit (Gabriel), to him, whose duration is fifty thousand years can come out in a day. ”

(Surat Mearic, 4)

**Beginning to be downloaded in 610**

**So clearly in the Qur'an**

**the relativeity of time is mentioned**

**that it is a Divine book.**

**is another proof.**

Time is a concept that depends entirely on perceiving. Same time

While it may seem long to one person, it can be quite short for someone else.

Clock to find out which one is making the right guess,

resources such as calendar are needed. Time without these

It is impossible to make an accurate prediction about.

**SIZE IN RAIN**

Another information about the rain in the Qur'an is that rain

It is that downloaded. It is stated in Surah Zuhruf as follows:

"That He lowered water from the sky with a certain amount,

he 'resurrected (and spread life all over it) with a dead hometown with him';

You will also be removed (from your graves). "

(Surah Zuhruf, 11)

This measure in the rain was also determined by research in our age. the measurement

According to this, 16 million tons of water evaporates from the earth in one second. In a year this

the amount reaches 505 trillion tons. This is also rain falling on Earth in a year

The amount is. In other words, water is rotating "on a scale" in a constant balance.

The continuation of life on earth is also provided by this water cycle. Human having

never use this loop artificially

It can not perform.

Even if there is a slightest change in this amount, a big

ecological imbalance will arise, which will bring the end of life. But

this is never the case; rain, as reported in the Qur'an, every year on earth

continues to descend the same amount.

## THE FORM OF RAIN

How the rain was formed was a secret for people for a long time. However, the weather radar

After discovering, the stages through which the rain is formed is certain

won.

Accordingly, the rain occurs through three phases: First, the rain  
Its "raw material" is ventilated. Then clouds form and finally  
rain droplets appear.

What is said about the formation of rain in the Qur'an is exactly these processes.

Tend to. One verse gives the following information about this formation:

“Allah sends the winds so that a cloud lifts it.

if he wishes, he spreads it in the sky and makes it piecemeal; its finally

you see the rain flowing through it. Finally own

When they give whatever they want from their servants, they immediately become delighted. ”

(Surat al-Rum, 48)

Let's examine the three phases expressed in the verse technically.

**STAGE 1: "God sends the winds ..."**

**The myriads caused by foaming in the oceans**

**air bubble is constantly appearing and water**

**the particles are constantly rushing into the sky.**

**These pellets, rich in salt, later**

**carried by the winds and upward in the atmosphere**

**they take the road. This little called an aerosol**

**particles called a "water trap"**

**water rising from the seas with the mechanism**

With the foaming in the oceans in the above drawing

water particles formed to be thrown into the sky

Seen. This is the first in the formation of the rain

---

## Page 16

**tiny drops of vapor in their environment**

**form the cloud drops by collecting them.**

**STAGE 2: "... so how does a cloud remove it?**

**if he wishes, he would spread it in the sky and smash it**

**Makes ... "**

**Salt crystals or dust particles in the air**

**clouds due to water vapor condensing around**

**It occurs. The water droplets in them are very small**

**(0.01 to 0.02 mm diameter) in the air**

**they hang and spread to the sky. So the sky**

**covered with clouds.**

It is the phase. Water in the clouds formed after that

droplets will hang in the air and they

will concentrate to form rain. Of these stages

all are fully reported in verses.

**STAGE 3: "... you finally see the rain flowing through it."**

**Water particles coming together around salt crystals and dust particles are thoroughly**

**they form the raindrops by concentrating. So a heavier than air**

**Drops coming to the location leave the cloud and fall to the ground in the form of rain**

**They begin.**

**As can be seen, every stage in the formation of the rain, in the verses of the Qur'an**

**It is reported. Moreover, these stages are explained in the correct order. world**

**As in many natural events, God gives the most correct explanation in this,**

**moreover, this announcement is made to people with the Qur'an centuries before its discovery.**

**In another verse regarding the formation of the rain, the following information is given:**

**"Didn't you see that Allah's clouds continue, then**

**it unites them, and then stacks them together;**

**so you can see the rain flowing through them.**

**The mountains (like clouds) full of heaven bring down it,**

**he hits whatever he wishes, and turns him whatever he wishes; of lightning**

**its glow will almost dazzle and take away. "**

(Surat an-Nur, 43)

**Small pieces of cloud (cumulus**

**clouds) by the winds**

**are pushed from where they are and**

they merge, that is, the phrase in the verse  
with "... Allah's clouds are ongoing,  
then  
It combines ... "it is.

**Scientists doing research on cloud types  
faced with surprising results regarding the formation of rain.  
Rain clouds within a certain system and stages  
is formed and shaped. One of the rain clouds  
The formation stages of cumulonimbus type clouds are scientifically  
It is as follows:**

**STEP 1, Drift: Clouds are located by winds**

**They are pushed from the ground, that is, driven.**

**STEP 2, Merger: This little pushed by the wind  
size clouds (cumulus) merge where they drift, new  
creates large clouds.**

**STEP 3, Accumulation: After small clouds merge, large**

**The upward traction force in the cloud increases. the cloud  
the pull up force in the center is more than the pull on the sides  
it is strong. These updrafts are vertical of the body of the cloud**

---

## Page 17

**causes it to grow. So the clouds go up  
it expands and stacked on top of each other. This has grown vertically  
towards the cooler parts of the atmosphere of the body of the cloud  
causes it to grow. Here at this point the atmosphere is cool  
In the regions, drops of water and hail begin to grow in the cloud.  
As a result of these stages, water and hail drops - the power of up-pull them  
too heavy to support - when they get heavy, rain from clouds, hail, etc.  
They start to fall. 10**

**It should be noted that meteorologists are concerned with cloud formation, structure and function.  
using the advanced equipment (aircraft, satellite, computer etc.)**

**They have learned. It is evident that in these verses, Allah told us 1400 years ago.**

**It gave information that was not known.**

**(A) Separate small pieces of cloud (cumulus clouds) (B) Small  
in the bigger cloud that comes together when the clouds come together  
pulls up so that the clouds stack up.**

**Upwards  
expanding top  
stacked  
clouds vertical  
as they grew up  
for the atmosphere  
cooler  
towards  
They reach.**

**The atmosphere is cool  
water in the regions  
and full drops**

**begins to grow. Heavily water drops from the cloud  
rain, hail etc. begins to fall. That's it  
Scientific fact 14 centuries ago in the 43rd verse of Surat an-Nur:  
"... and then piles them up so that,  
you see the rain flowing through them ... "  
has been reported by Allah.**

### VACCINATING WINDS

**The "vaccination" feature of the winds in one verse of the Qur'an and consequently**

**It is noted that rain has formed:**

**"And the winds as inoculants  
so we sent water from the sky  
We downloaded and watered you ... "  
(Surat al-Hijr, 22)**

**Note that the first step in the verse is the winds.**

**It is drawn. However, until the beginning of this century, rain with wind**

**The only relationship between them was known as the wind dragging the clouds. Modern**

meteorological findings, on the other hand, "inoculating" role in the formation of winds rain showed that they were playing.

This grafting feature of the winds takes place as follows:

Numerous weather on the surface of the oceans and seas at any time due to foaming bubble is formed. As soon as these bubbles burst, one-hundredth of a millimeter they throw thousands of particles in the air into the air. These particles called "aerosol",

---

## Page 18

by mixing with the dust coming from the land by the winds, to the upper layers of the atmosphere moved. Particles carried by the winds to such heights, here with water vapor touches. The water vapor also accumulates around these particles and condenses turns into droplets. These water droplets first come together to gather the clouds creates, after a while descends to the earth as rain.

As you can see, the winds are free from water

"inoculates" them with the particles they carry so that the formation of rain clouds It provides.

If the winds do not have this feature, the water droplets in the high atmosphere have no time would not occur and there would be no such thing as rain.

The important point here is that this critical task of the winds in the formation of rain

It is stated in the Qur'anic verse centuries ago. And people's natural events in an era they knew almost nothing about ...

## Page 19

THE SEAS DO NOT MIX

The seas, very recently by researchers  
One feature that has been identified is as follows in Surah Rahman  
Notified:

“Two seas to meet each other

He released. There is an obstacle between the two;  
they don't cross each other's border. ”

(Surah Rahman, 19-20)

Opened to each other but the waters never mix with each other

This feature of the seas reported in the verse, ocean scientists

It was discovered very recently by. "Surface  
tension "due to a physical force called" neighbor

It was revealed that the waters of the seas did not mix. the sea  
surface tension caused by different densities, almost a  
prevents water from mixing like walls. <sup>11th</sup>

Satellite from the Strait of Gibraltar  
taken photo

Of course, the interesting thing is that people are neither physics nor surface tension, nor  
in a time when they were not aware of ocean science,  
is reported.

In the Mediterranean and Atlas

Big waves in the ocean,

strong currents and tides

has. The water of the Mediterranean,

Atlas in the Strait of Gibraltar

It meets the ocean. But this

the result of the encounter

temperature, salinity and density

features do not change. Because two

an invisible between the sea

there are limits.

**DARK AND INNER WAVES IN THE SEAS**

“Or (the deeds of those who disbelieve) are like darkness in a vast sea; her  
a wave covers it, a wave above it, and a cloud above it.

Some part some part

darkness on it; When he pulls out his hand, he will almost not even see him. God

Whoever did not give light, there is no light for him anymore. ”

(Surat an-Nur, 40)

The general environment in the deep seas is described in the book "Oceans" as follows:

Today we know that darkness in deep seas and oceans,

approximately 200 m. and in deeper places. At this depth,

there is almost no light. At depths below 1000 m.

It is no longer possible to come across light in any way. <sup>12</sup>

---

## Page 20

Today, the general geographical structure of a sea, the characteristics of living creatures in it,  
In addition to information such as salinity, the amount of water it contains, its surface area and  
depth

It is also possible to obtain information. Produced using today's technology  
vehicles such as submarines and various special tools are used to access this information.  
they are important intermediaries.

Made with today's technology

According to the measurements 3-30% of sunlight

reflected on the sea surface. Top 200

If the light spectrum is blue

7 colors with the last light

all absorbed sequentially.

no longer in the depths below

possible to come across light

1400 years to this scientific reality

first in the Surah Nur of the Quran,

Attention was drawn in verse 40.

A person is deeper than 40 m without these tools.

it is almost impossible to dive. However a

200 m from the oceans without human help. around

It is also possible to live in the depths of the dark.  
 It is not. So scientists have been  
 They discovered detailed information very recently. Whereas  
 "The dark of the vast seas" in the verse in Surat an-Nur  
 The statement was reported 1400 years ago.  
 Because of no technology, people  
 at a time when there were no tools to dive into  
 Of course, such information was given in the Qur'an.  
 is one of his miracles.  
 However, it is stated in the 40 verse of Surat an-Nur  
 "... It looks like darkness in a vast sea;  
 it occupies a wave, a wave above it, a wave above it  
 there is cloud..." is another scientific in the Qur'an.  
 points to the miracle:  
 Scientists recently "different  
 density between layers of density  
 inner waves occurring on their interfaces  
 They found that. Inner waves of the sea and  
 it covers the depths of the oceans because  
 deep seas than water on them  
 they have a lot of densities. Inner waves surface  
 acts like waves. Like surface waves  
 they can also break. Inner waves, through the human eye  
 invisible, but temperature in a particular area  
 and when the salinity changes are examined  
 waves are noticeable. <sup>13</sup>  
 The above expression with the expressions in the verse  
 they are completely parallel to each other.  
 A person without researches  
 but on the surface of the sea  
 can know the existence of waves. These  
 occurring in the sea outside  
 to be aware of fluctuations  
 It is not possible. But in Surat an-Nur  
 God is the second in the depths of the seas  
 drew attention to a waveform. Of course, scientists recently  
 this truth they discovered once again reveals that the Qur'an is the word of Allah.  
 It also illustrates.

---

## Page 21

### A REGIONAL SHAPING OUR MOVEMENTS

"No; If he does not put an end to this (this attitude), he will  
 we will grab it by its rivet and drag it; He is a liar, sinful forehead. "  
 (Surat Alak, 15-16)

The definition of "get liar, sinful" in the verses above is extremely  
 it is remarkable. Because the researches made in recent years, get front of the skull  
 It showed that the region has a part of the brain that manages some activities.  
 1400 years ago, information about this region and its mission, which was noted in the Qur'an  
 today's scientists have been able to explain in the last 60 years.  
 When looking inside the skull and the front of the head, the forehead region of the brain will be seen.  
 Researches in physiology about the functions of this region  
 information obtained as a result of the book Essentials of Anatomy and Physiology  
 It goes as follows:  
 "Get motivation, planning foresight and initiation of movements  
 It occurs in the frontal forehead (cerebrum), which is the anterior part of the lobes.  
 This is a region of my corps (union) cortex ... " <sup>14</sup>  
 The book also includes the following statements about this region:

"Along with his interest in the movement, that aggression is also a functional center is thought..."<sup>15</sup>

As can be seen from these explanations, the frontal region of the brain, planning, motivation and good or bad moves about starting, telling lies or truth conducts all of the activities. Alak as seen With the phrase "take the false sinner" in Surah the above definition shows a great parallelism. The last of the scientists Such scientific facts they discovered in sixty years have people were first informed by Allah.

#### **BIRTH OF HUMAN**

In the Qur'an, when people are called to faith, quite different topics are mentioned. God, sometimes the heavens, sometimes the earth, sometimes animals and plants shows evidence. Again in many verses, people turn to look at their own creation. It is advised. How man came to the earth, what stages he went through, and the basics What is the item is often reminded. For example, in a verse it is said: "We created you, will you still not certify? Now Have you seen the semen you poured into the (womb)? You guys Are you creating or are we creative? " (Surat Al-Faqa, 57-59)

---

## **Page 22**

The creation of man and its miraculous feature are emphasized in many more verses. But there is such information among these emphases that these people lived in the 7th century are the details he would never know. Here are some of them:

- 1) Man is not from the whole of the semen fluid but rather from a very small part of it. (from sperm) is created.
- 2) The male determines the gender of the baby.
- 3) The human embryo sticks to the mother's uterus like a leech.
- 4) Man develops in three dark regions in the womb.

In the century in which the Qur'an was downloaded, people surely have the basic substance of birth sexual

they knew that it was about the semen from the man after the intercourse. the Children an average of 9 months to be observed easily, research to know was a subject that did not require. However, the information we have listed above is was above the level of knowledge. These are only possible by 20th century science. It was discovered.

Let's examine this information in order.

#### **A drop from the menu**

In the picture above pouring semen can be seen. 250 million thrown from men a little as much sperm the amount to reach the egg Success. Will fertilize the egg who managed to survive if possible Only up to 1000 sperm is one. All of man not from the menu, but from the menu a very small inside consists of parts, In the Qur'an, a drop of water " notified.

#### **A Drop From the Menu**

An average of 250 at a time from a man during sexual intercourse million sperm are discarded. Until the sperm reach the egg, they have a hard journey in their body. 250 million on this journey Only a thousand of sperm manage to reach the egg. Five minutes half salt at the end of the race that will end later

sized egg accepts only one of the sperm  
you will. So the essence of man is not the entire sine, but smaller than him  
is a part. This truth is explained in the Qur'an as follows:

“Human beings will be left 'alone and irresponsible'  
Does he think? Himself, a drop from the drained menu  
Wasn't it water? ”

(Surah Doomsday, 36-37)

If we pay attention, in the Qur'an, it is not the whole of the human  
the news that it was made from a small piece taken from it  
It is given! The special emphasis in this statement, but modern science  
The truth explanation discovered by the expression is the Divine  
is evidence that there is a source of information.

#### MIX IN THE MENU

##### Mix in the Menu

Nutritious fluid called semen and carrying sperm is only from sperm  
It does not occur. On the contrary, semen consists of a mixture of different liquids. These fluids,  
possessing the sugar to meet the energy needed by the sperm, the base  
neutralizing the acids at the entrance of the mother's womb with its feature  
They have duties such as providing a slippery environment.

---

## Page 23

Interestingly enough, when talking about semen in the Qur'an, this is what modern science reveals.  
the truth is also pointed out and the semen described as a "chaotic" liquid

It is:

“Surely We created man from a complex drop of water. Him-her-it  
We're trying. We made him hearing and seeing.”

(Surat an-Man, 2)

In another verse, it is pointed out that semen is a mixture.

It is emphasized that the mixture was created "from the core":

“He makes everything he creates the most beautiful and creates a human  
is from mud. Then his lineage from a core  
made of water. ”

(Surah Prost, 7-8)

The Arabic word "sulala" translated here as "essence" is the best part of the essence or thing  
means. It means "part of a whole", whatever it is taken. This

The situation is the word of the Quran, a Will that knows the creation of man to the finest detail.  
clearly shows that This Will belongs to God who created man.

In the Qur'an, masculinity and femininity are created from "the semen poured into the womb".

It has been reported. However, until recently, the mother cells of gender

It was thought to be determined by. This knowledge given in the Qur'an

He discovered it in the 20th century. With regard to the creation of man in the Qur'an  
similar centuries ago it was reported.

#### GENDER OF BABY

##### Gender of the Baby

Until recently, humans were born by the mother cells of the sex of the baby.

they thought it was determined. Or at the very least, the cells from the mother and father

they were supposed to determine gender together. However, in the Qur'an there is a different

information is given and masculinity and femininity are created "from the semen in the womb"

It has been reported:

(Surat Necm, 45-46)

The accuracy of this information given in the Qur'an, genetics and microbiology sciences

It has been scientifically proven with the development. Gender is completely male

determined by incoming sperm cells, the woman has no role in this work

it turned out that

---

## Page 24

The factor in determining gender is chromosomes. Determining the human structure 46  
Two of the chromosomes are called sex chromosomes. These two chromosomes  
XY is defined as male and XX as female. The reason for that is in question  
is that chromosomes look like these letters. Y chromosome is masculinity and X chromosome is  
carries femininity genes.

The formation of a human, these chromosomes located in pairs in men and women  
It starts with the merger of each. Woman is divided into two during ovulation  
Both parts of the germ cell carry the X chromosome. However, it is divided into two  
The germ cell produces two different sperms, including X and Y chromosomes. Women  
If the X chromosome found is combined with the sperm containing the X chromosome in the male  
will be the baby girl to be born. If it merges with sperm containing the Y chromosome, this time  
the child to be born becomes a man.

So the sex of the child to be born, which of the chromosomes in the man  
depends on how it will merge with its egg.

Undoubtedly, none of them until the science of genetics appeared, that is, until the 20th century.  
It was not known. On the contrary, in many cultures, the female body of the sex of the child to be  
born

The belief that he was determined by was widespread. For this reason, women who gave birth to girls  
He condemned.

Whereas in the Qur'an, this superstition was taught to people 13 centuries before the discovery of  
genes.

a refusal was given, the origin of the sex is not the woman but the semen from the man  
reported to be.

X chromosome is female, Y chromosome is female

It has the characteristics of masculinity. Mom

female sex only in the egg

X chromosome that determines.

In the menu from the father, both X and

sperm carrying the Y chromosome

located. So the sex of the baby

sperm that fertilizes the mother's egg

To carry the X or Y chromosome

It depends. So as stated in the verse

determining the gender of the baby,

is the semen from the father. the Qur'an

in the century it was downloaded

this knowledge, which cannot be known,

Proving that it is the word of Allah

is one of the proofs.

#### **RAHME HANGING HOLDER**

#### **"Alak" Hanging on the Womb**

To examine the information given by the Qur'an about the formation of man  
when we continue, with some very important scientific miracles

We encountered.

When the sperm from the male and the egg in the woman are combined, they will be born  
the baby's first essence is formed. As "zygote" in biology

This single cell, defined, will divide and multiply in no time

and it will become a small piece of "meat".

However, the zygote does not achieve this growth in vacuum. Uterus

Baby in the womb,

in the first stage of its development

from her mother's blood

uterus to be fed

clinging to the wall

---

## **Page 25**

It hangs on its wall. Thanks to the extensions it has,

Like roots that settle, it sticks here. Thanks to this bond, its development

It can absorb the substances it needs from the mother's body. <sup>16</sup>

Here, a very important miracle of the Qur'an appears. God

In the Qur'an, talking about the zygote that started to develop by holding on to the mother's womb  
while using the word "related":

“Read in the name of the Creator Lord. He is a human

created. Ok, the Lord has the greatest charity. "  
(Surat Alak, 1-3)

The meaning of the word "Alak" in Arabic means "hanging on somewhere  
Well, the word actually sticks to the skin and  
used for sucking leeches.

Undoubtedly, the developing zygote in the womb is described with this feature.  
using a word that says, Allah, the Lord of the Worlds,

It proves once again that it has been downloaded by.

in a zygote state.

A meat in the picture above

part of

zygote is seen.

Of modern embryology

this formation that he detected

In the Qur'an, "hanging on"

meaning, to the skin

leeches that cling to blood

Also used for "related"

14th century

previously a miraculous

It has been reported.

## MUSCLE WRAPPING THE BONES

### Wrapping Bones with Muscle

Another important information reported in the verses of the Qur'an is that  
formation stages. In verses, bones are formed first in the womb, more  
then it is reported that the muscles appeared and surrounded these bones:

"Then we created that drop of water as a related (cell group);

then we created that ala as a piece of chewy meat; then he

we created the chewed meat piece as a bone; so meat on bones

Clothed; then we built it with another creation. Most of the creators

How beautiful is Allah, who is beautiful. "

(Surah Believer, 14)

The branch of science that studies the development of the womb is embryology. And embryology

In the field, until recently, bones and muscles appeared together and developed.

it was believed. That is why some people have been using these verses for a long time.

He claimed that he had fallen. However, thanks to the developing technology, more advanced

microscopic examinations are completely accurate to those reported in the Qur'an.

revealed that.

These microscopic examinations show that in the womb,

an improvement as described in the exact verses takes place. Prior to

cartilage tissue in the embryo ossifies. Then the muscle

cells are selected from the tissue around the bones and come together

and it wraps around the bones. This means "Developing Human"

It is described as follows in a scientific publication named "Evolving Human":

First ossification as a continuation of cartilage at 6th week

occurs in collarbone. Long at the 7th weekend

Development in the womb

---

## Page 26

ossification has also started in the bones. Bones continue to form

while muscle cells are selected from the tissue surrounding the bone, muscle

They make up their mass. This is how the muscle tissue

it decomposes to the anterior and posterior muscle groups. <sup>17</sup>

completing baby

bones of a certain period

then he is surrounded by muscles.

In short, the formation stages of man described in the Qur'an, modern embryology  
is in full agreement with its findings.

Many of the development of man in the womb

stage is reported in the Qur'an. Muminun

Mother, as reported in verse 14 of Surah

cartilage as the first stage of the embryo in the abdomen

tissue ossifies. And then these bones

It starts to be surrounded by muscle cells.  
May this development be said, "... then chew it  
we created the piece as a bone; thus  
we put meat on bones ... "  
described in the way.

### THREE PHASES OF BABIES IN THE WOMEN

Baby's Three Phases In The Uterus

In the Qur'an that man was created with a three-step creation in the womb

It is reported:

"... you in your mothers belly, in three darkness, from a creation  
then (another) creates (transforms) into creation. Request  
This is Allah, your Lord, the property is His. Other than Him  
They do not. Yet how are you translating? "

(Surah Zumer, 6)

Notice that in the verse, in the mother's womb, there are three different

It is pointed out that it occurred at the stage.

Indeed, modern biology today is embryological in the womb of the baby.

revealed that its development took place in three different periods. Medicine today

In all embryology books taught as textbooks in their faculties, this subject

It is among the most basic information. For example, basic reference on embryology

This is true in one of his books, "Basic Human Embryology".

is expressed:

Life in the womb consists of 3 STAGES; preembryonic (first 2.5 weeks), embryonic (8.

by the end of the week), and fetal (from the 8th week to the birth).<sup>18</sup>

These stages, which are defined as "trimester", that is, "three terms" in the medical language,

it includes different stages of development. The main features of these three stages of development

are briefly

It is as follows:

- Preambryonic stage:

In this first phase, commonly referred to as "1st trimester", the zygote multiplies by dividing, a

Once it becomes a mass of cells, it embeds itself into the wall of the uterus. cells

As they continue to multiply, they are organized in 3 layers.

---

## Page 27

Embryonic stage:

The second phase, also known as "2nd trimester", lasts for a total of 5.5 weeks.

is called "embryo" throughout. At this stage, from the cell layers

the basic organs and systems of the body emerge.

Fetal stage:

When the period called "3rd trimester" of pregnancy is entered, the embryo is no longer

It is called "fetus". This period starts from the eighth week of pregnancy

and lasts until birth. The distinguishing feature of the previous period is the face and hands of the  
fetus

and it is a living creature with a distinctive, human appearance. the period

3 cm at the beginning. Despite being tall, all its organs have emerged. This period

It takes up to 30 weeks and development continues until the week of birth.

This information about the development of the mother's womb can only be achieved with modern  
technological tools.

It was obtained by observations. However, as can be seen, this information

Like many other scientific facts, miraculously, news in the Qur'anic verses

It is given. A humanity has no detailed knowledge of medical issues

During the period, such detailed and accurate information was given in the Qur'an, of course.

It is clear evidence that the Qur'an is not a human word, but a Word of Allah.

In the 6th verse of Surah Zumer, in the womb of man,

occurs in three phases that differ from one to the other

It is pointed out. Really today

modern embryology, the baby's womb

that embryological development takes place in three different periods

showed.

MOTHER MILK

Breast milk can be used for the baby's nutritional needs.  
to relieve and protect the baby from possible infections  
It is a unique blend created by God. Nowadays  
Even baby food prepared with technology is miraculous  
cannot replace food.

The benefits of breast milk for baby are increasing day by day.  
emerges more. The new science related to breast milk

One of the facts he discovered is that the baby is breastfed for 2 years.  
is extremely beneficial to feed throughout. "

Allah tells us this important information that science has just discovered.  
(separating from milk) is in two years ... "14 centuries ago  
She reported.

"We advise one's parents (treating them with kindness)

We have. Her mother carried her with difficulty (on her stomach) on difficulty. Her  
(weaning) is within two years. "To both me and your parents

Thank goodness, the return is only a ban. "

(Surat Lokman, 14)

IDENTITY IN FINGERPRINT

---

## Page 28

In the Qur'an, it is very easy for God to resurrect people after death.

When describing, people are especially attracted to the fingertips:

"Yeah; even compiling his fingertips - (again)

we are able to put it in order. "

(Surah Doomsday, 4)

It is extremely wise to emphasize the fingertips in the verse.

Because all people's fingerprints are completely private. That

The fingerprint of every person living on Earth

It is different. Moreover, people who have lived throughout history

It is different.

That's why fingerprinting is a very important "identity"

card "is counted and used for this purpose all over the world.

But the important thing is that the feature of the fingerprint

that was discovered towards the end. Before that, people

fingerprints as lines with no features or meaning

He has seen. But in the Qur'an, even anyone's attention at that time

fingerprints are highlighted and these marks are only

attention is drawn to the importance noticed in our age.

Including identical twins

that every person  
fingerprint is unique.

In other words, people

ids at your fingertips

It is encrypted. This encryption

system today

barcode being used

liken to the system

It is possible.

### SCIENTIFIC VERSES

SUPPORT FOR SCIENTIFIC AND SCIENTIFIC ACTIVITY:

FIRST VERSION -ALAK / 1-5. O Muhammad! READ in the name of your Lord, who created man  
from clotted blood!

READ! Rabbin, who teaches with PEN, informs man that he does not know, has the greatest kerem.

ZÜMER / 9- Say: Would anyone ever know who knows?

FATIR / 28- Only scholars are afraid of Allah among His servants.

BAKARA / 269- Whoever has been given wisdom, undoubtedly he has been given a lot of charity.

the owners receive signatures.

HADÍS-İ SHERIFFS:

"Obtaining knowledge is a must for every Muslim woman and man."

---

"To anyone who turns to seek knowledge, Allah makes the path of heaven easier."

"Certainly, scholars are the heirs of the prophets."

"Wisdom (knowledge) is the lost property of the believer, wherever he finds him."

"Learning science is obligatory from cradle to grave."

"The ink of the scholar in judgment is heavier than the blood of the martyr in Mizan."

"The sleep of the scholar is better than the worship of the ignorant."

"Science, go and get it, even in China."

**\* Some Good Words Explaining the Relationship between Science and Religion:**

"Science, humanity, telegraph, electricity, diagnosis and treatment of a number of diseases

He gave his remedies. Religion also provides the spiritual calmness and moral mobility in individuals.

would.

Science and religion are two real keys that we use to open the treasures of the universe.

Man benefits from knowledge, but lives with religion. "

(William James)

"Every formula that expresses a law of nature is a Divine praising God."

(Maria Mitchell)

"Anyone who is seriously engaged in science, regardless of its field,

He will read the following inscription on the door of the temple:

"Believe!" Faith, the man of knowledge

It is an indispensable feature. "

(Max Planck)

"The belief in the Creator of the Universe is the strongest and most noble of scientific research.

it is its driving power. "(Albert Einstein)

"Religion without religion is blind, and religion without religion is lame."

(Albert Einstein)

"Science and religion do not hate each other (do not deny each other), they know that because they complement.

one of them is the light of the mind, the other is the light of the heart

(heart). And what a human mind alone

nor is it just heart. But it is an intelligent and energetic being.

Religion without religion may satisfy the mind, but surely the heart will darken. Thus

unscathed religion also radiates spirit and heart, but leaves the mind in the dark.

Consequently, the goodness and benefit of humanity, lonely knitting as what it is today  
neither is it to be connected, nor is it to embrace religion alone as in the middle times. But  
is to have both. "

(Ali Fuad Başgil)

"The scholars, who study the creatures of Allahu Ta'ala,  
they understand better than anyone. "

(Fahredden-i Razî)

## ***SCIENTIFIC VERSES***

### ***UNIQUE BALANCE IN THE ENVIRONMENT:***

KAMER / 49- Certainly, we have created everything according to a measure.

RA'D / 8- Everything is in a measure in his sight.

### ***-LOCATION OF THE LOCATION WITH GOK:***

ENBİYA / 30-Those who are unbelievers, did not see that we separated them when the earth was adjacent to the sky.

We created everything with life from water. Don't they still believe it?

---

## **Page 31**

### ***ROUND OF THE WORLD:***

ZÜMER / 5- He created the heavens and the earth with truth, wrapping the night over the day (spherical

wrapping), wrapping the day over the night. He made the sun and the moon at his disposal, each with a certain

until it flows. It is well known that He is very powerful and forgiving.

NEML / 88- You see the mountains standing frozen in place, whereas they pass like clouds.

### ***-GORROWS 'DIRECTIONS:***

ENBİYA / 33- It is He who creates night, day, sun and moon.

Each of them travels in its own apartment.

YASİN / 38- The sun is also proof that it is flowing in its own way. This is very powerful and knows everything

It is Allah's discretion.

DAMAGE / 7- Let the sky have paths,

### ***- MOUNTAINS AND FEATURES:***

NEBE / 6- Didn't we make the earth a cradle?

NEBE / 7- Didn't we make the mountains a pile?

LOKMAN / 10- He created the heavens directly, you see them. Heavy to shake you to earth he left pressures (hard and large mountains) and produced there from each animal. A water from the sky

we brought them down and raised plants from every beautiful couple (or every nice variety).

### ***-PAIRS IN CREATION:***

YASİN / 36- All the pairs of the plants of the earth, their own nafs and what they may not know

How great is the glory of God who created him.

### ***WATCHING WINDS:***

HICR / 22- We sent the winds as an inoculant and lowered water from the sky and watered you with it. That water

You are not the one who keeps in the treasures.

## **-MORE OF THE SEAS:**

RAHMAN / 19. (Bitter and sweet) released the two seas, meeting each other.

“20. But there is an obstacle between them, they do not interfere with each other.

---

### **Page 32**

#### ***-HUMAN CREATION:***

RESURRECTION / 36. Does the human think he will be left alone?

“/ 37. Wasn't that a drop (sperm) from the pouring plum water?

#### ***-GRAFT SHOOTING LAW:***

Ra'd / 2. God is He who raised the heavens straight,

LOKMAN / 10- He created the heavens directly, you see them.

RAHMAN / 7. He raised the sky and put the balance (balance).

HAC / 65- He keeps the sky (protecting and holding it in the air) from falling down without permission. Surely Allah

is very compassionate to people, very merciful.

#### ***-AIR PRESSURE:***

EN'AM / 125- Whoever wants to guide Allah, he opens his heart to Islam. Whom to mislead

If he wants, he makes his chest narrow and distressed, as if he is rising into the sky. God, those who do not believe

leaves it in such filth.

**MATERIALISM AND RELIGION AND SCIENCE**

This person of intelligence and conscience is the absurdity of an assertion that the world was formed by chance.

understands easily. In short, every person who thinks by using his mind and conscience,

He can see his evidence with all its clarity. These people are mentioned in a verse as follows:

*They chant Allah while standing, sitting, lying on their side and*

*They think about the creation of the heavens and the earth. (And they say :)*

*"Our Lord, you have not created this in vain. You are so great, us*

*protect from the torment of fire. "(Surah Al-i Imran, 191)*

Therefore, Allah reveals people in the Qur'an the proofs of creation around them.

calls to think and study. The systems that exist in the entire universe are every person who studies inanimate beings, thinks and investigates what they see

---

### **Page 33**

He will begin to recognize the superior mind, knowledge and infinite power of God. of God

Some of the issues that he calls people to think about are as follows:

It is reported:

*Don't they look at the sky above them? How did we build it and how did we decorate it? He has no cracks. Place (how)*

*Döşeyip-spring? We left unshakable mountains in him and he said, and the heartwarming 'we've finished from every couple (nice plants). (These are) 'Heartfelt*

*'An inner eye for wisdom' and 'for every servant' who turned to Allah*

*It is zig. And we brought holy (abundant and merciful) water from the sky; so we finished the gardens and the grains to be cut with it. And each other There are also high palm trees with buds lined up on it. (Kaf Surah, 6-10)*

*Take a look, from what thing was it created? (Surah Tarik, 5)*

For example, a scientist who studies the eyes only when you see the complex system in the human eye, by chance, that it cannot happen gradually. moments. When you examine a little more, every detail in the formation of the eye

He witnesses a miraculous creation. Your eyes are full with each other seeing it consists of tens of separate parts working in harmony and his admiration for God, who created him, is multiplied.

Likewise, a scientist who studies the universe is he finds thousands of miraculous balances at the moment.

It is immense that it is not possible to determine its limits billions of galaxies in space and these galaxies the existence of billions of stars in great harmony his sustainability gives him a great enthusiasm for research.

Because of these, a faithful human scientific research about making and learning the secrets of the universe, willing and determined. Considered to be the greatest genius of our time who believed in an article by Albert Einstein (above left)

This igniting power of scientists brought:

"I can argue that, religiously, cosmicly intuition is much stronger in scientific studies

It is felt. There is no doubt that this feeling is

The first installers with the mentality were the strongest senses.

---

## **Page 34**

The structure of the universe in a scientific and rational way understanding gives people the deepest sense of faith.

The understanding of the universe they have grasped over the years, He gave Kepler and Newton such deep emotions.

To taste the taste of Johannes Kepler Creator's works saying that he is interested in science, the greatest science in history Isaac Newton, one of his men, made his scientific research the reason behind the effort to do is to find and know God stated that.

Einstein set out from religious facts when determining people's goals stated that they should get out:

Religion determines the real target of man. But which science at the point that the means should be used There are also things to say. Science is the truth shaped by those who want to learn It is installed by executing the frameworks. But, basically, Religion is also largely at its source. Any science that I don't have a deep faith in I can't think of the man.

6

With the huge telescope that Edwin Hubble uses, the stars are both from us, he also discovered that they were constantly moving away from each other.

If everything is diverging from each other in the universe, the only thing this shows is

there was a result: the universe was expanding, that is, the materialists claim

It was not as stationary as they did.

The fact that the universe cannot be stationary is actually Albert Einstein he had theoretically calculated. However, as a result of these accounts, the data he made were incompatible with the stationary universe model of that period.

he did not dwell on this invention and left it aside.

Even a scientist who was considered the greatest genius of the century like Einstein

influenced by materialist dogma and revealed this important discovery He subtraction. Einstein later described this incident as "the greatest error " .

Another important fact demonstrated by the expansion of the universe there was: since the universe has expanded, backwards over time when we go, the universe starts to expand from a single point was appearing. As a result of the calculations, this single point It was understood that it should have zero volume. This is the universe

---

## Page 35

it appeared with the explosion of the point. "*Big Bang*" to this explosion that is, it was called "*Big Bang*" .

In fact, the statement that this exploding point has zero volume is used theoretically. Because of the zero volume expression money is "absence". So the universe came out of nothing. The most accurate as "created from nothing".

The Big Bang theory clearly states the fact that the universe was created out of nothing

It showed. But for this theory to be accepted, evidence had to be found. George in 1948

Gamow, in case the universe is formed by a big explosion,

As Lemaitre previously stated, this explosion in the universe that there is a residual radiation and that this radiation

He suggested that he should have an equal amount all over him.

This evidence that Gamow said should be found in a short time appeared. In 1965, Arno Penzias and Robert Wilson

the researcher discovered these radiation residues. "Cosmic Fund

This radiation, called "radiation", is not of local origin,

it was a radiation scattered all over the universe. So for a long time

of the heat wave taken equally from all over the universe, the Big Bang

It turned out to be from the early times. Penzias and Wilson,

They won the Nobel Prize for these findings.

When 1989 was reached, the American Space Research Department

NASA launched COBE into space to investigate Cosmic Background Radiation

sent his satellite. Precision placed in this advanced satellite

the scanners, Penzias and Wilson's measurements in a few minutes confirmed in.

For example, the American known for his work on the Big Bang scientist William Lane Craig makes this statement:

Indeed, the rule of "nothingness out of nothingness"

appropriately, a supernatural cause of the Big Bang

should be. Singularity before the explosion, all kinds

the boundary where time-space concepts end

is that the Big Bang has a physical reason

impossible. On the contrary, the cause of the Big Bang, physical

space and time completely transcended, completely from the universe

independent and unimaginably powerful

is required. Moreover, this reason is its own independent

There must be a conscious being who has the will ...

---

## Page 36

So the reason for the origin of the universe is just because the universe a will that, at its own will, existed a certain time ago

It is creative.

8

Science such as the fact of creation, biology, anatomy, paleontology

He pioneered scientists in the establishment of branches. creatures

first time in a classification and "founder of systematics" known as Carl Linnaeus; fossil science and comparative Georges Cuvier, the founder of anatomy; hereditary laws first Gregor Mendel, who discovered the science of genetics by discovering it once or "19.

Louis Agassiz, who is regarded as "the greatest biologist of the 20th century America"

great scientists, all living species by Allah

They made science knowing that it was created.

However, today it is desired to be put between religion and science.

forced separation, by science's own findings

It is refuted. Religion gives us the universe from nothing

teaches that it was created, and science, on the other hand,

finds evidence. Religion tells us that living things are

teaches that it was created by, science is alive

The proofs of this reality

reveals. Michael Denton (left), Nature's

At the end of his book *Destiny*, he said, "Once upon a time

Science, considered the biggest ally of skepticism, finally the second thousand

At this time when we're finishing the year, Newton once anthropocentric, as his followers wanted.

"has become the biggest defender of faith."

<sup>41</sup>

Anthropocentric belief, the world for man by God is the belief that it was created.

This conclusion made by science is that more and more scientists

It makes him sincerely believe in Allah. Famous biochemist

"Becoming a Creator or a nature beyond nature,"

believing in the existence of popular media stories

is much more than he describes; make up 90% of the general population

a belief that believers are different among scientists

why not "

<sup>42</sup>

Then this expresses the truth .

---

## Page 37

But what is interesting is that the people in question blindly embrace materialism.

is loyal and is about never leaving this "faith"

they show a surprising stubbornness. Harvard, a famous materialist

**University professor of genetics Richard Lewontin, this bigoted materialist confesses his attitude as follows: We have a belief in materialism, This is a priori (previously accepted, correctly assumed) belief. Us what compels science to bring a materialist explanation to the world not the methods and rules. On the contrary, a priori with materialism because of our commitment, bringing a materialistic explanation to the world we construct research methods and concepts. Materialism is absolute it is true that a divine explanation is allowed to enter the stage. We can not.**
